

Experience the **industrial metaverse** with Cognite Data Fusion® and Microsoft® Azure today

Are your field workers connected with your digital twins or working in silos?

Cognite connects your industrial enterprise from field to simulations, across your workforce, and digital twins to the physical environment. Experience simple access to complex industrial data for everyone – and everything.

Don't repeat the pilot purgatory of digital twins. Design with scalability and business value in mind from the start.

1. Ubiquitous access from any connected device for all employees
2. User experience over technical sophistication that hardly anyone can use or even wants to use
3. Everything architected for substantially non-linear cost of use case scaling
4. Based on open standards for data and model interactivity across ecosystem

At Cognite, we **ensure success** for industrial customers such as:

Cognite Data Fusion® is an innovative SaaS solution designed for industry to solve high-context, mission-critical operational challenges for scaling digital twins and unlocking the industrial metaverse for value.

Forrester: The Total Economic Impact™ of Cognite Data Fusion®

**400%**  
return on investment

**70%**  
attributable productivity gain

**\$21.56M**  
in business value over 3 years

Supercharge your Microsoft® Azure platform to **unlock the industrial metaverse for value** with the world's leading Industrial DataOps solution Cognite Data Fusion®

## Turnkey solutions with days to value that scales.

Industrial, simple, and scalable with Cognite Data Fusion® and Microsoft® Azure

Industrial operators today are under pressure to improve performance, streamline workflows, and minimize risk with fewer resources and a smaller bench of subject matter experts.

Manufacturers need safer, more predictable, comparable operations across lines and sites.

Petrochemical operators need to scale predictive insights across production assets and processes.

Power generators must ensure asset reliability across aging fleets and adapt to new market opportunities.

Cognite is a global industrial SaaS company established with a clear vision: to rapidly empower industrial companies with accessible, reliable, and contextualized data to drive the full-scale digital transformation of asset-heavy industries around the world. Our

core Industrial DataOps platform, Cognite Data Fusion®, enables industrial data and domain users to collaborate quickly and safely to develop, deploy, and scale digital solutions to deliver both profitability and sustainability

### Industrial

Cognite Data Fusion® is built for industry, incorporating decades of domain expertise into software that is ready to use out-of-the box and can be easily customized to your unique business process.

### Simple

Intuitive and user-friendly for a broad range of data stakeholders and collaborators, Cognite Data Fusion® offers unparalleled self-service data discovery, orchestration, and solution development.

### Scalable

By enabling standardization, customization, and governance of data and solutions at scale, Cognite Data Fusion® excels at accelerating deployments and driving down the incremental costs and complexity of scaling.

## Celanese — Customer case study

With Cognite Data Fusion® and Microsoft® Azure as the platform for an integrated manufacturing portal, Celanese has successfully unlocked scalable value for their Digital Plant of the Future program:

### Wave 1

Initial impact of the integrated manufacturing portal at a lighthouse site

- Improved visibility and collaboration across the unit
- Improved tracking and trending of historical data
- Reduced time spent on data discovery and analysis

### Wave 2

Next phase of the Digital Plant of the Future program

- Deliver solutions across autonomous inspection and contextualized data platform
- Operationalize high-impact use cases across their lighthouse facility
- Scale use cases to additional global facilities
- Replicate repeatable use cases across all sites

Don't remain stuck in the pilot purgatory of digital twins.

**Leap into your collaborative industrial metaverse** with Cognite Data Fusion® and Microsoft® Azure today.
